

Congratulations

**To our teachers, Bella Githere, Denise King, and Ingrid Sparks
on the acceptance into the Trustey Family STEM Teaching Fellows!**

These teachers were selected as one of 9 schools in the program's fifth cohort and will join over 120 teachers from the program's first four cohorts.

The Trustey Family STEM Teaching Fellows is a competitive, three summer, two school year program that seeks to improve STEM teaching and learning for all students. Fellows will attend three Summer Institutes at the University of Notre Dame in South Bend, Indiana, beginning in July 2019. Throughout the school year they will receive content specific coaching for their instructional practice and targeted support as they expand access to and opportunities for STEM learning in their school.

The Trustey Family STEM Teaching Fellows is sponsored by the University of Notre Dame Center for STEM Education, housed in the Institute for Educational Initiatives at the University of Notre Dame in South Bend, Indiana. The Center for STEM Education's mission seeks to help all students, especially those underserved and in Catholic schools, engage and excel in the STEM disciplines through research and the translation of research into practice.

**St. Bernard's Catholic School is very excited
to begin this two and a half year journey – and beyond –
to help improve STEM teaching and learning throughout our school**
